Professional Summary

Product and UX engineer, currently Chief Product Officer at Gamersberg (1.5M+ registered users). Translate business needs into requirements and technical documentation, design the experience, and build responsive web and mobile interfaces in React, Next.js, React Native and TypeScript. Rebuilt Gamersberg's trading frontend, implemented its community messaging and designed its CMS dashboard with the team.

Skills

Product & Delivery	:	Requirements analysis, technical documentation, API requirement specs, prioritisation, cross-functional coordination, testing and release readiness, process standardisation
Engineering	:	React, Next.js, TypeScript, JavaScript, React Native, Expo, HTML/CSS, Tailwind CSS, REST API integration, Lighthouse audits, Git, GitHub
Design	:	Figma, user flows, interaction design, design systems, responsive design, prototyping
Data & Cloud	:	SQL, PostgreSQL, GCP deployments, CI/CD (working knowledge, alongside backend engineers)
Also used	:	Jotai, shadcn/ui, Framer Motion; AI-assisted development with Claude and Codex

Experience

Chief Product Officer — Jul 2025 – Present
Gamersberg — *Remote*

- Partner with leadership and engineering to scope platform capabilities, prioritise requirements and coordinate delivery across web and mobile. Helped broaden the product from trading into game communities, Rooms, content and rewards; registered users grew from about 200K to 1.5M during my tenure and the Android app passed 50K Google Play downloads.
- Implemented responsive community and messaging interfaces across web and React Native, covering channel navigation, replies, reactions, message actions, attachments and unread states.
- Helped plan the content management system, designed its dashboard and built reusable page templates and parts of its content logic to standardise how game content is published, specifying the backend APIs it required.
- Document feature behaviour, edge cases, testing feedback and backend dependencies for messaging, profiles, badges, activity and rewards, including API needs for message search, content history and read state.
- Coordinate consistency and release readiness across Community Servers, Rooms, giveaways and rewards, tracking outstanding integration requirements.
- Ran Lighthouse and other performance audits and documented recommendations for engineering.

Product Designer & UI Engineer — Mar 2025 – Jul 2025
Gamersberg — *Remote*

- Rebuilt the trading platform's legacy frontend around reusable components and responsive layouts for offers, requests and item comparison.
- Adapted web layouts and interaction patterns into the mobile app's first interface.

Associate UI/UX Designer — Aug 2024 – Mar 2025
Benepik Technologies — *Gurugram*

- Analysed enterprise workflows and redesigned legacy screens with clearer information hierarchy, navigation and standardised components; worked with developers on implementation.
- Designed and specified the interaction states for a Hero FinCorp employee rewards experience.

UI/UX Graphic Designer Intern — Feb 2024 – Apr 2024
Jai Kisan — *Bengaluru*

- Created interface mockups and visual assets for fintech products in line with established design and brand standards.

Education

Christ University — Bengaluru
Bachelor of Computer Applications (BCA) — *2021 – 2024*
